Dear Sir/Madam

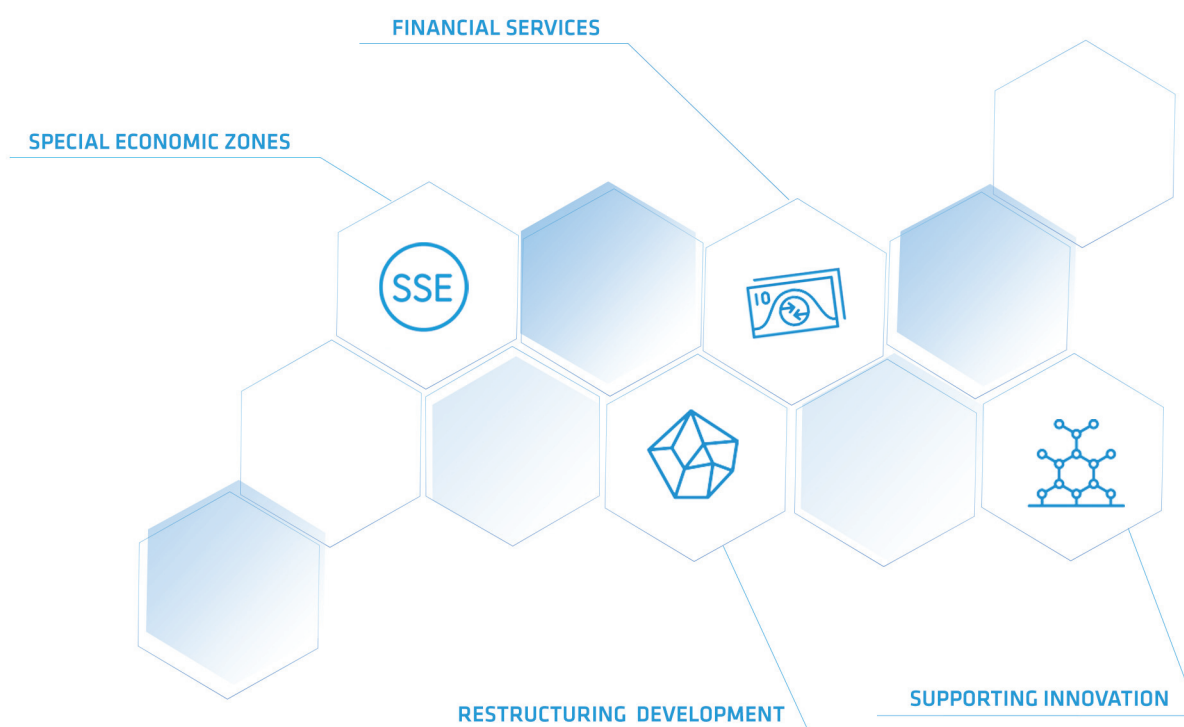

Strengthening Polish economy is one reasons why the Industrial Development Agency S.A. was established almost 30 years ago. Since then we have actively cooperated with companies, granting them support, both financial and substantive. The investments carried out by IDA JSC respond to the needs of Polish economy being an important element of the Strategy for Responsible Growth.

We give you our export product catalogue, divided into two parts. The first of them concerns the most important areas of activity of the Industrial Development Agency S.A., while the second presents the companies of the ARP Capital Group with a view to exporting their products. Thanks to a comprehensive presentation of the activities of several dozen companies in the investment portfolio of IDA JSC, we want to familiarise investors and stakeholders with current activities and development directions in the IDA Capital Group. We hope that the information contained in the catalogue will be of interest to you and will prove to be an opportunity to increase the export opportunities of the presented companies.

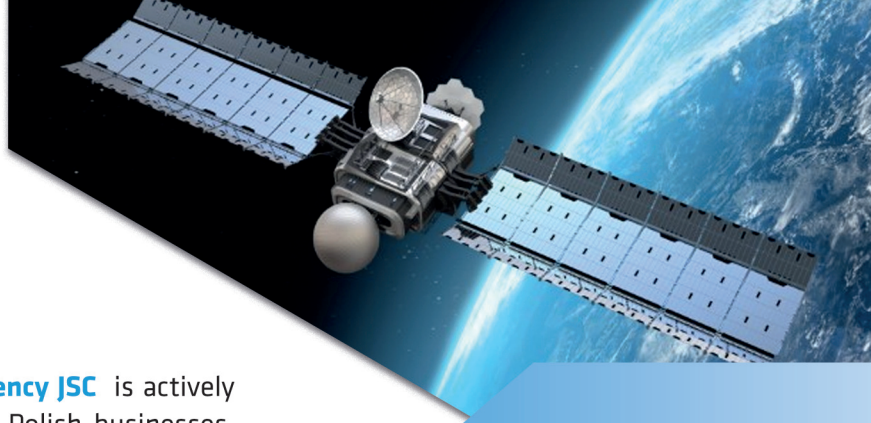

Cezariusz Lesisz
President of the Board
Industrial Development Agency JSC

Industrial Development Agency JSC

Industrial Development Agency JSC is part of the Polish Development Fund Group. The Agency is supervised by the Prime Minister. The Agency's basic activity is to support entrepreneurs in running and developing their business, and thus plays an important role in increasing the competitiveness of the Polish economy. IDA JSC is the only state owned commercial law company on the market that specialises in implementing restructuring processes. The support instruments available to the IDA JSC include both financial products and non-financial assistance in the implementation of projects, mainly through the preparation of long-term business strategies and the provision of investment areas and production facilities under the management of the IDA JSC Special Economic Zones.

The Industrial Development Agency JSC as part of the PFR Group develops a package of solutions which are the answer to business challenges faced by Polish entrepreneurs. Together with key institutions supporting the development of companies in Poland, IDA JSC offers practical instruments in such areas as entrepreneurship and innovation development, support of restructuring processes, enterprise financing, trade and foreign investments.

The Industrial Development Agency JSC is actively involved in the development of Polish businesses, and for several years now it has also supported companies whose projects have a positive impact on the development of Polish technological thought. IDA JSC acts for the development of innovativeness of enterprises, in particular through investments in sectors and technologies that build competitiveness of the Polish economy. IDA JSC is wherever things happen that are important for building the industry of the future, both in Poland and abroad.

**Support for
innovation**

One of the projects conducted by **IDA JSC** is the IDA Innovation Pitch. It is an event supporting the cooperation of small and medium-sized enterprises with large entities organised in the Open Innovation formula. The main objective of the undertaking is to find innovative technological solutions that can bring tangible benefits to the enterprise. The initiative is addressed to large entities interested both in searching for innovative technologies, non-conventional solutions and in cooperation with small and medium-sized entities.

**IDA
Innovation
Pitch**

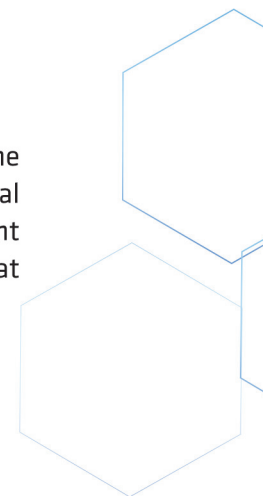

In order to support the innovative economy and stimulate its development, IDA JSC launched the Technology Transfer Platform. On that platform, registered users, both originators and large enterprises, can inform about their innovative solutions, innovation needs, as well as search through the technology and expert database. The advantage of this form of information exchange is a special system for associating donors with technology recipients. Currently, over 1 400 technologies are registered on PTT.

**Technology
Transfer
Platform**

Renewable Energy Sources

The Industrial Development Agency JSC has in mind the challenges facing the Polish economy in the light of global warming. IDA JSC is actively involved in the development of renewable energy sources. This is one of the issues that are at the centre of attention of the modern economy.

Offshore Wind Energy

IDA JSC is one of the leading entities acting to strengthen the potential of the Polish supply chain for the offshore wind energy sector.

Offshore wind farms have been identified in the "National Energy and Climate Plan for 2021-2030" as one of the key technologies for achieving the EU renewable energy target by 2030. Offshore development brings with it great opportunities to support local production and service businesses involved in the supply chain, as well as to build a high position for Polish entrepreneurs in the regional, European and global value chain of offshore wind energy.

Electromobility and photovoltaics

Another example of commitment to reducing greenhouse gas emissions is the activity in the field of photovoltaics and electromobility, where IDA JSC participates in projects which are to result in the Polish e-bus. One of the companies in the IDA's portfolio deals with the ecological use of waste, which is processed into RDF fuel.

Special Economic Zones Industrial Parks of the IDA

For 30 years now, the Industrial Development Agency has been successfully attracting Polish and foreign investors to the Special Economic Zones it manages, where ARP Industrial Parks - EURO-PARK Mielec, EURO-PARK Wisłosan and EURO-PARK Kobierzyce - operate.

The main incentive to invest in the Special Economic Zones is public aid in the form of income tax exemption at the highest level permitted in the EU.

IDA JSC has extensive experience in providing comprehensive services to investors. The basic investment opportunities offered by IDA JSC are greenfield - well-connected and developed land for investments, brownfield - ready-made production and storage halls for sale, rent, lease or hire, build-to-suit - construction of large-area facilities according to the investor's needs. IDA JSC can boast a large number of large-area facilities built to meet the individual needs of entrepreneurs.

Until 2026, Special Economic Zones will operate in parallel with the new programme "Polish Investment Zone", whose assumptions are based on the act on supporting new investments.

Polska
Strefa Inwestycji

The Polish Investment Zone is a government programme, where investors can obtain tax relieves in any location in Poland. Special support can be provided to companies that contribute to the growth of innovation in the Polish economy.

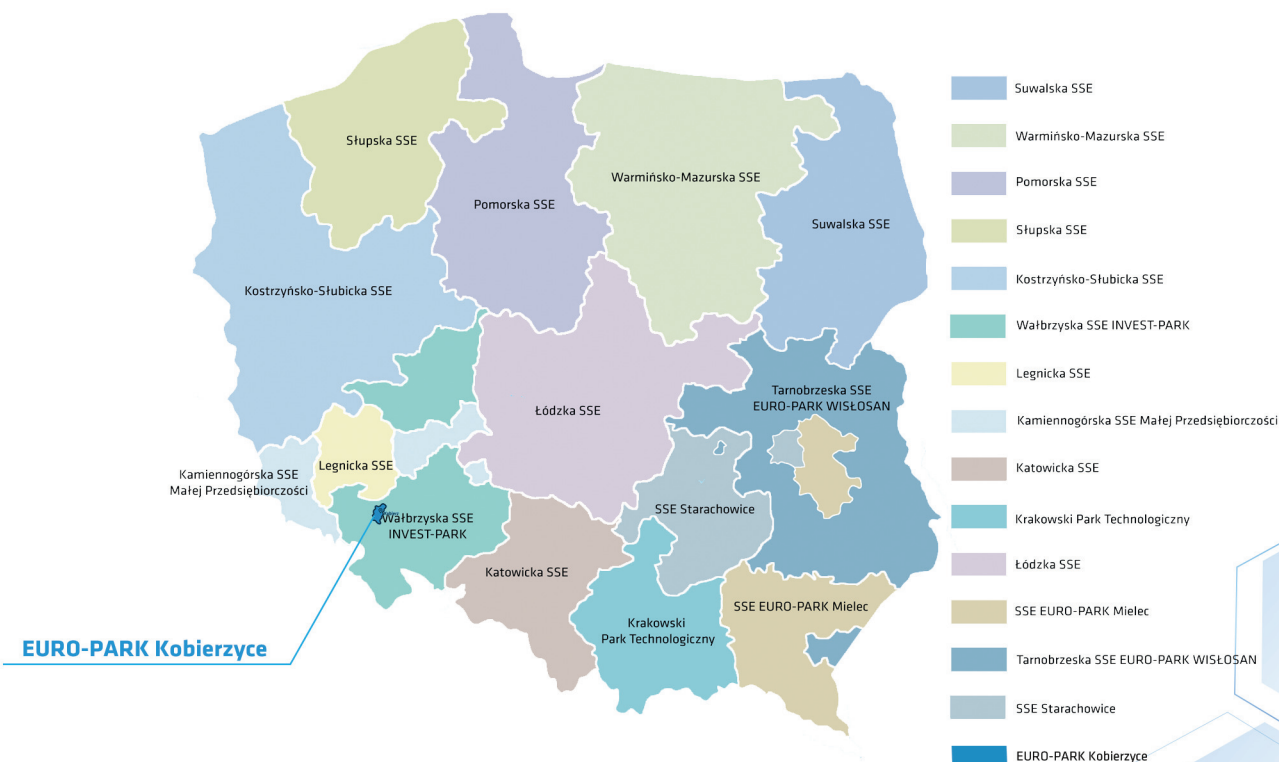

EURO-PARK Kobierzyce

EURO-PARK Kobierzyce is an industrial park established in 2005 in Kobierzyce municipality (Lower Silesia). The park was established as a response to the growing need to locate industrial plants near Wrocław. EURO-PARK Kobierzyce covers two areas - Biskupice Podgórne and Bielany Wrocławskie, with a total area of approx. 410 ha, of which 240 ha are developed land intended for investments.

Currently there are more than 30 investors operating in the park - mainly global and innovative companies from the automotive, electronics and engineering industries. A significant part of the investments is carried out by companies from South Korea. In the area of EURO-PARK KOBIERZYCE there is the largest European factory producing batteries for electric cars LG Chem and investments of cooperating companies (among others LG Electronics, Starion Poland, LG Innotek, Enchem Poland, Dongshin Motech).

The entrepreneurs who have contributed financially the most in EURO - PARK Kobierzyce are:

- LG Chem Wrocław Energy sp. z o.o.
- LG Electronics Wrocław sp. z o.o.

Special Economic Zone EURO-PARK MIELEC

euro-park
mielec

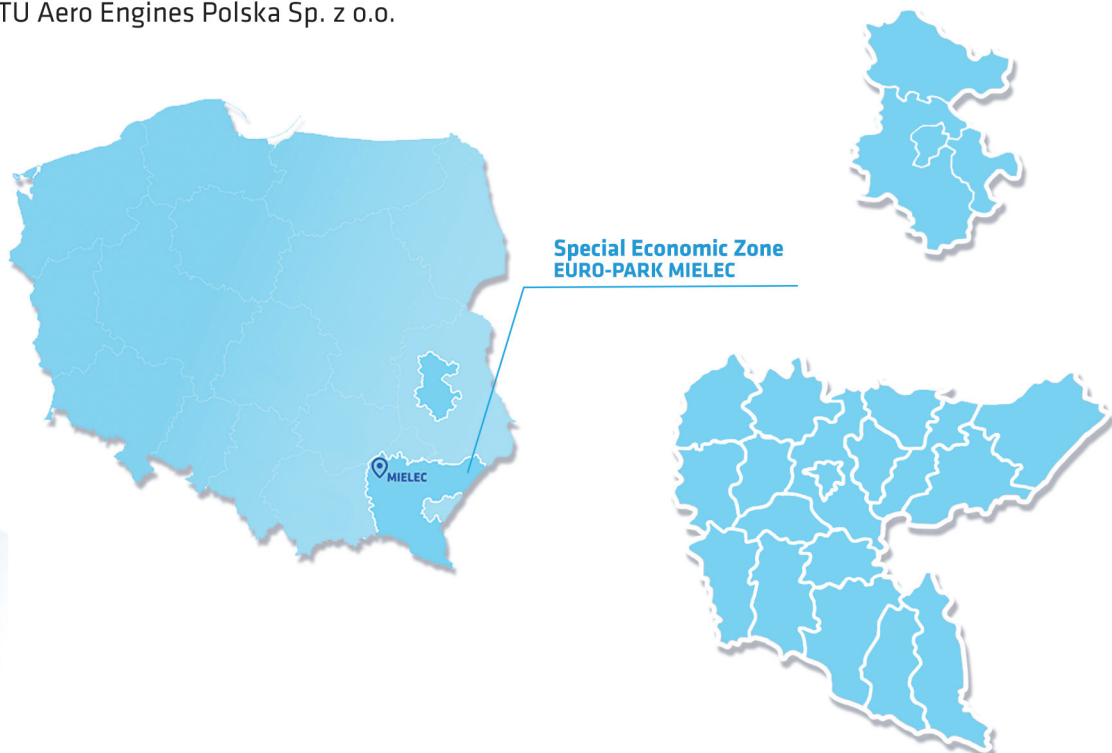

EURO-PARK MIELEC is the oldest Special Economic Zone in Poland. It was established in 1995. It is located in the Podkarpackie and Lubelskie Voivodeships. Its main objective is to increase economic activity of the area and reduce unemployment. EURO-PARK Mielec is also called the Aviation Valley. Leading industries in the Special Economic Zone EURO-PARK Mielec are aviation, automotive, plastics, IT, wood processing, food processing and pharmaceuticals.

The largest investors in the EURO-PARK Mielec SEZ are: Goodrich Aerospace Poland (aviation), BORGWARNER POLAND (automotive), MTU Aero Engines Poland (aviation) and Kronospan Mielec (wood processing).

The largest employers in the EURO-PARK Mielec SEZ are Polskie Zakłady Lotnicze (aviation), BURY (electronics), Lear Corporation Poland II (automotive), Firma Oponiarska Dębica S.A. (automotive industry) and Pratt & Whitney Rzeszów (aviation).

The entrepreneurs who have contributed financially the most in SSE EURO-PARK Mielec are:

- Kronospan Mielec Sp. z o.o.
- MTU Aero Engines Polska Sp. z o.o.

Tarnobrzeg Special Economic Zone EURO-PARK WISŁOSAN

euro-park
wistosan

The Tarnobrzeg Special Economic Zone EURO-PARK Wisłosan was established in 1997 and covers four provinces - Podkarpackie, Mazowieckie, Dolnośląskie and Lubelskie.

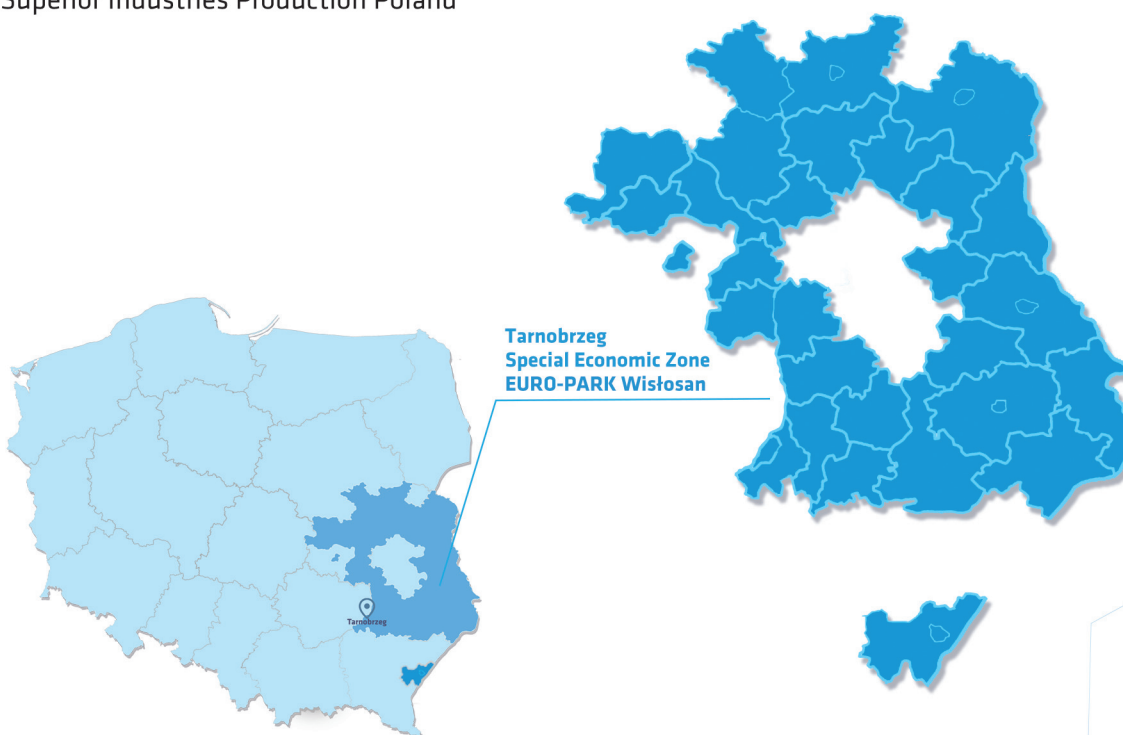

The main objective of the SEZ is to increase the economic activity of the areas and reduce unemployment. A broad-gauge metallurgical railway line (LHS), which ensures fast transport of goods to the Eastern countries, runs through the TSSE. Leading industries in EURO-PARK Wisłosan are the automotive industry, aluminium processing, electronics, production of building materials, chemistry, household appliances, machinery and furniture.

The biggest employers in the TSSE EURO-PARK Wisłosan are:

- ATS Stahlschmidt & Maiworm sp. z o.o.
- LG Display sp. z o.o.
- Nowy Styl sp. z o.o.
- Pilkington Automotive Poland sp. z o.o.

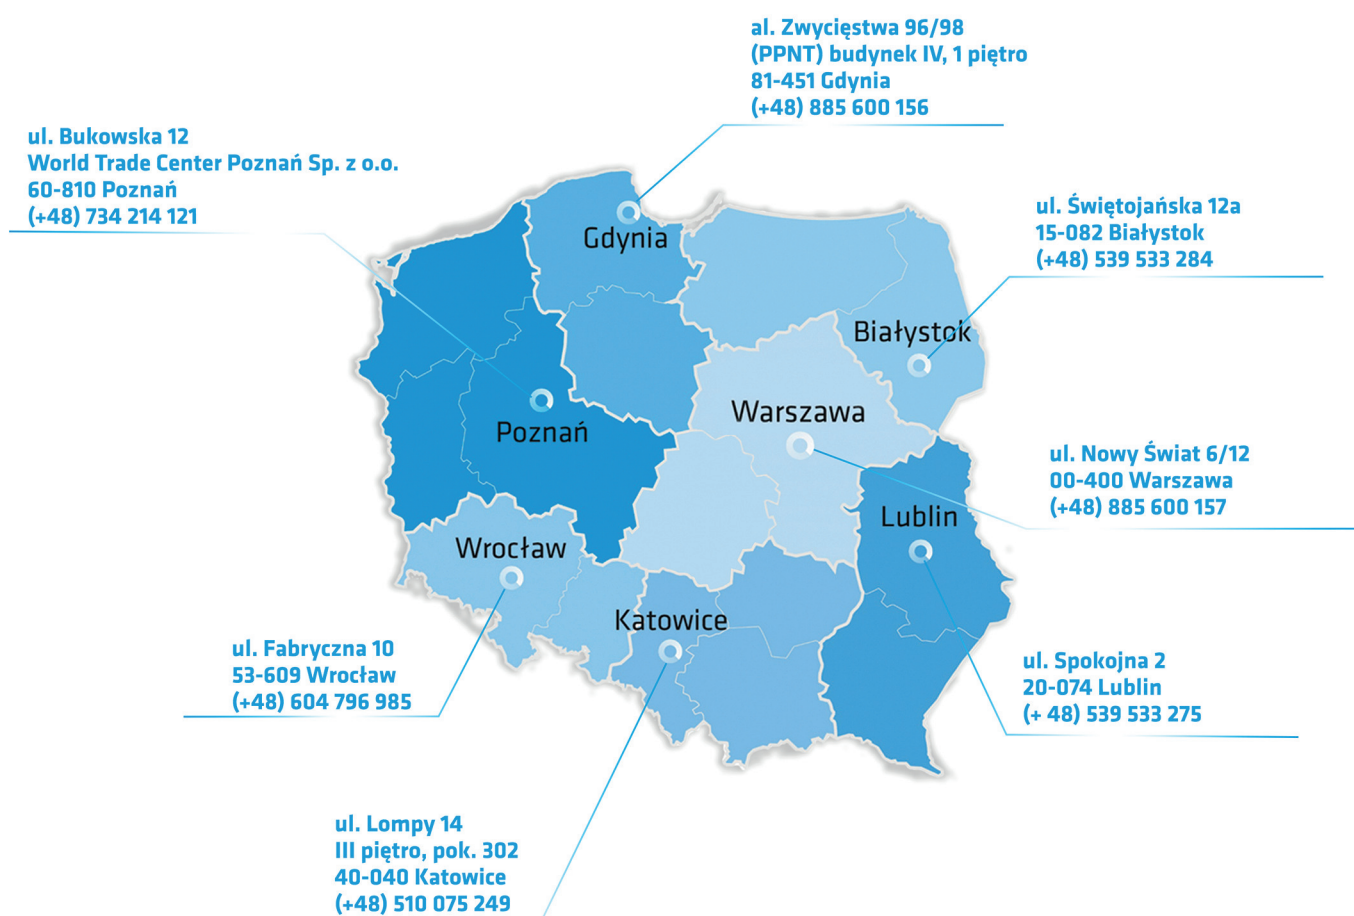

The entrepreneurs who have contributed financially the most in TSSE EURO-PARK Wisłosan, are:

- Federal-Mogul Gorzyce
- Superior Industries Production Poland

Entrepreneur Service Centres (COP)

Since 2019, **IDA JSC** has also offered its products to the SME sector. Small and medium-sized enterprises are supported by Entrepreneur Service Centres, which are opened in various cities throughout Poland.

The financial services offered by **IDA JSC** are unique on the Polish market, because together with the financing, the client receives support from experts already at the stage of applying for financing. The loan offer includes investment and working capital loans, whose repayment period and terms are adjusted to the individual needs of entrepreneurs.

Loan offer

Includes investment and working capital loans, loans to finance contracts and loans that enable entrepreneurs to provide liquidity. The IDA JSC also enables the use of restructuring loans.

Lease offer

IDA Leasing provides leasing services and professional consultancy to entrepreneurs planning investments in industrial assets, such as machinery, equipment or technological lines. The Company specializes in financing difficult assets, such as complicated technological lines of specific parameters and extended time of their construction. IDA Leasing's offer complements the financial offer of the Industrial Development Agency for small, medium and large enterprises.

Factoring offer

Is dedicated to companies that provide products or services with deferred payment terms. Its main advantage is the release of funds frozen in unpaid invoices. Additionally, the company is certain to receive the funds immediately after the invoice is issued and can count on the optimization of the management process.

Instruments supporting export

Entrepreneurs who are interested in exporting their goods will find in COP information on instruments supporting export, which are available within the competence of the Polish Development Fund Group.

The castle in Baranów Sandomierski

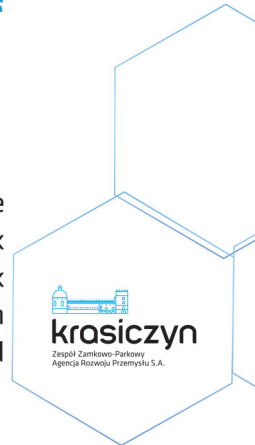

The fact that the Industrial Development Agency JSC owns and manages two castle and park complexes in south-eastern Poland also proves how diverse the activities are. In both castles, apart from museums, there are also restaurants and comfortable hotels, which are a perfect place for rest or a conference.

The castle in Baranów Sandomierski is one of the most eminent former magnate residences in Poland. At the same time, it is one of the best preserved Renaissance buildings in Europe. Having been damaged in World War II, the castle was rebuilt and restored by the state. Since 1997 the owner of the Castle and Park Complex has been the Industrial Development Agency JSC. Information on reservation and the stay in the castle is available at: www.baranow.com.pl

Krasiczyn Castle

Krasiczyn Castle is an impressive monument of the Polish Renaissance located on the route Przemyśl - Sanok, not far from the border with Ukraine. It is surrounded by a landscape park with over 200 species of trees and shrubs from all over the world. In 1996 the Castle and Park Complex in Krasiczyn was taken over by the Industrial Development Agency JSC. The renovation and construction works carried out by IDA JSC led to the creation of a modern tourist, hotel and catering base in the Castle and Park Complex in Krasiczyn. Information on reservations and stay at the castle is available at: www.krasiczyn.com.pl.

INSTYTUT WZORNICTWA PRZEMYSŁOWEGO sp. z o.o

Instytut Wzornictwa Przemysłowego sp. z o.o., is a strategic adviser to companies, public administration, institutions and designers in the area of design development and launching new design products on the market. The institute provides professional advisory and expert services in the fields of:

- design, its applications and increasing market effectiveness of the implementation of innovative products and services, product audit, audit of the design management process,
- design strategies for companies in the context of diagnosed design, market and industry trends,
- preparing and carrying out competitions for the selection of design service providers.

Offer:

- design strategies, design audits, creation of design briefs and design projects for new products
- preparation of conferences and training courses in the field of design
- creation of concepts for design competitions and exhibitions and their implementation
- development of concepts for publishing houses, books, catalogues, advertisement prints and their implementation

CREOTECH INSTRUMENTS S.A.

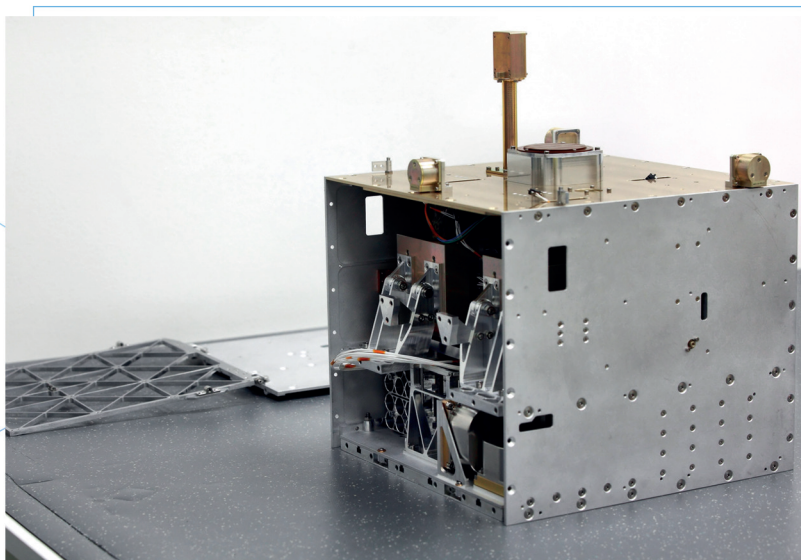

CREOTECH INSTRUMENTS S.A. is the fastest growing Polish company operating in the space industry and science and research. Apart from numerous projects carried out on behalf of the European Space Agency (ESA), the company produces precision measuring devices which are delivered to research institutes all over the world. CREOTECH INSTRUMENTS S.A. offers several lines of specialist products based on its own technological solutions covered by patents developed by the research team. Currently, Creotech Instruments S.A. is implementing eight projects of the space sector, and seven more are at the preparation stage, including the project of microsatellite integration.

Offer:

- time synchronization systems (hard-real time systems)
- electronic assembly
- drones management systems
- ultimately: microsatellite platform

BYDGOSKIE ZAKŁADY PRZEMYSŁU GUMOWEGO STOMIL S.A.

BYDGOSKIE ZAKŁADY PRZEMYSŁU GUMOWEGO STOMIL S.A. is a leading manufacturer of rubber products both on the domestic and foreign market. The company exports its products to Germany, USA, Great Britain and Sweden. STOMIL produces the highest quality rubber products, which are used in various areas of industry. The rich offer includes, among others, industrial hoses, hydraulic hoses and pipes as well as rubber plates and linings. The company also specializes in power hydraulics and in providing services in the area of space lease and rental. STOMIL is an important supplier of products for many key sectors of the economy, such as mining, engineering industry or agriculture.

Offer:

- hydraulic hoses
- fittings for hydraulic hoses
- industrial hoses
- rubber boards and linings
- seals and extruded products

Certificates:

- Quality Management System according to EN ISO 9001:2015

FABRYKA OBRABIAREK RAFAMET S.A.

Fabryka Obrabiarek RAFAMET S.A. is a manufacturer of special machine tools for processing railway wheelsets. The company is one of the leading companies operating in this sector on the global market. RAFAMET S.A. is also a recognised and valued supplier of large-size specialist machine tools for customers in the engineering, energy, shipbuilding, metallurgy, aviation and armaments industries. The customers are also interested in the company's carousel machining centres, gantry milling machines or horizontal lathes. The key sales markets for the company's products are: China, Germany, Australia, India, Russia, Iran, Czech Republic, Indonesia, Thailand, France, Hungary, Congo, Qatar or Mauritania.

Offer:

- machine tools for companies operating rolling stock
- lathes: tracked, sub-track, including tandem, for wheels, for axles, milling machines for trolley frames
- rail-road shunting trolleys
- universal machine tools: rotary and horizontal lathes
- gantry milling machines
- castings for the following industries: machine tools, shipbuilding, energy, mining
- construction of technological lines, installation, repair and service of industrial machines, development of technological programmes, specialist IT, measurement and diagnostic systems

Certificates:

- Management System Certificate - Internal Control System (WSK) No W-81/10/2019
- Certificates: ISO 9001, ISO 14001, PN-N 18001

CENTRUM PRODUKCYJNE PNEUMATYKI PREMA S.A.

CENTRUM PRODUKCYJNE PNEUMATYKI PREMA S.A. is the largest Polish manufacturer of power and control pneumatics, which is used for mechanization and automation of production processes in the mining, metallurgical, energy and petrochemical sectors. The company also provides services in the field of galvanic coatings performed by its own galvanising plant, including: steel blackening, aluminium anodising, galvanising and technical chromium plating. CPP PREMA S.A. ensures high quality of workmanship thanks to a specialised Control and Measurement Chamber. The proof of the constantly growing reputation of the company is the winning of two gold medals at the Poznań International Fair and many awards and distinctions.

Offer:

- pneumatic actuators (ISO type and special designs)
- pneumatic valves (electromagnetic controlled)
- repair tool kits for the given assortment

Certificates:

- ISO 9001:2015 certificate issued by TÜV SÜD Management Service Gmb

MESKO-AGD sp. z o.o.

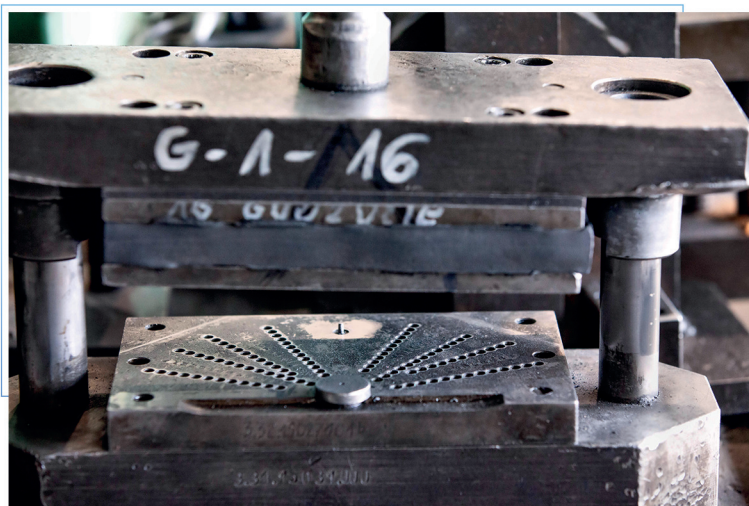

MESKO-AGD was separated from MESKO S.A. in December 2000 and became an independent manufacturer of high quality products for the HoReCa market throughout Europe. MESKO-AGD is primarily engaged in the production of food service equipment. The equipment produced by MESKO-AGD includes, among others, kitchen robots for small and medium catering with various functional attachments, vegetable grinders and toasters. In the production process the company uses new technologies necessary for plastic processing and heat treatment, pressure casting, welding and processing of plastics. About 60% of MESKO-AGD's production is exported to Germany, Austria, Czech Republic and Slovakia.

Offer:

- food processors
- meat processing equipment
- toasters
- egg foodlights
- vegetable shredders
- dough mixers

Certificates:

- CE Certificate

WARSZAWSKIE ZAKŁADY MECHANICZNE PZL-WZM W WARSZAWIE S.A.

WARSZAWSKIE ZAKŁADY MECHANICZNE PZL-WZM W WARSZAWIE S.A. is a showpiece of the Polish automotive industry, a unique manufacturer on a global scale of high quality components for injection systems used in diesel engines.

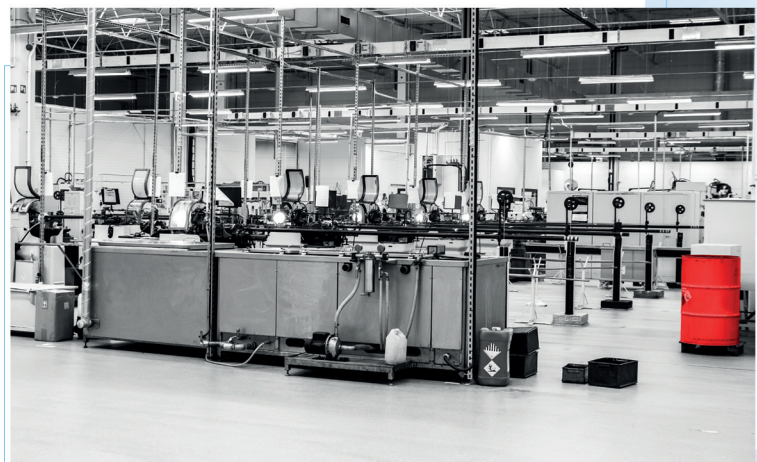

The precision of manufacturing determines the usability of parts in engines, thanks to which they can meet even the most demanding environmental standards. In the production process, the company uses modern, technologically advanced infrastructure and innovative solutions in the field of nanotechnology for the coating of details and heat treatment. WUZETEM S.A. can make highly specialized parts with indicated technological parameters on the order of an individual customer. The company distributes its products to over 50 countries.

Offer:

- nozzles for diesel engine injection systems
- pumping elements for fuel pumps
- injectors for military engines and generators

Certificates:

- ISO 9001 certificate (2015)

WYTWÓRNA SPRZĘTU KOMUNIKACYJNEGO POZNAŃ sp. z o.o.

The company is a valued Polish and international manufacturer of aviation equipment and fuel fittings used mainly for tractors and agricultural machines. WSK's offer includes machining, plastic, thermo-chemical and electroplating processes. The quality of the brand is guaranteed by qualified staff and many years of experience on the injection and aviation equipment market in Poland and abroad. The company is active both on the Polish and foreign market. It exports its products to Iran, Turkey and Great Britain, among others.

Offer:

WSK produces injection equipment such as:

- DPA pumps manufactured under license of Lucas (currently Delphi), used in diesel engine power systems up to 22KW
- DPA heads - main component of the DPA type injection pump
- DPS heads - main component entering a more modern DPS pump than DPA
- Spare parts for pumps and heads

As part of the aviation market equipment WSK produces:

- electrical mechanisms
- electrical valves and direct current electromagnets
- hydraulic dampers

Certificates:

- Certificate ISO 9001:2015 BV No. PL008545/P in the scope of: design, development, production and service of fuel, aviation and hydraulic equipment, heat, thermo-chemical, electroplating and machining services

MESKO-ROL sp. z o.o.

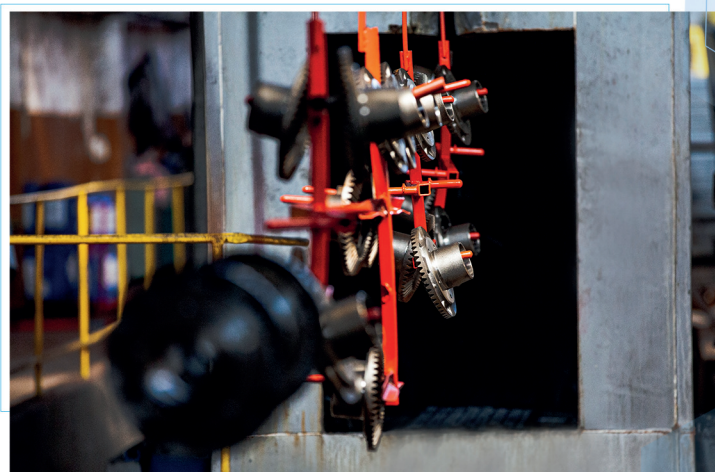

MESKO-ROL sp. z o.o. specialises in the production and sale of agricultural machinery for preparing and harvesting green fodder crops. The company offers a full range of spare parts for the machines it manufactures. The main customers buying the products are small and medium farms. The company also provides services based on its own machine park, such as metal cutting with the use of laser cutting machines, bending and stamping with the use of edge and hydraulic presses, powder painting, machining and welding of steel elements. Moreover, it offers full warranty and post-warranty service. The main markets for MESKO-ROL products outside Poland are Denmark, the Netherlands, Italy, Ireland and Great Britain.

Offer:

- rotary mowers
- tedders
- hay rakes
- tedder-rakes
- towed mowers: skid mowers and orchard mowers
- bale and straw grippers
- equipment for agriculture (e.g. feeders, pasture gates, loading boxes, drinkers)

Certificates:

- ISO 9001:2015
- European Certificate of „Rzetelni w Biznesie 2016” (Business Integrity 2016) awarded for high quality of work organization and management

KOPALNIA SOLI KŁODAWA S.A.

KOPALNIA SOLI KŁODAWA S.A. has been the main producer of rock salt in Poland for over 70 years. It applies modern processes of salt extraction and processing and offers good quality products at competitive prices. The scope of its activity includes salt extraction, production and sale of road salt, industrial and food salt, salt lickers, brittle and salt accessories.

Salt products of the Company are differentiated in terms of grain composition and additives such as e.g. potassium iodide in food salt, mineral additives in animal licks, or anti-caking agent added to road salt. The Company offers the possibility of creating individual offers, in accordance with the requirements set by the customer.

Offer:

- consumer salt
- road salt
- industrial salt
- feed salt
- bathing salt
- salt lickers for animals (made of natural rock salt and with mineral additives)
- salt brittle - natural salt blocks as lollipops for animals and for the construction of salt caves and caves, salt lamps etc.

Certificates:

- ISO 9001:2015
- ISO 22 000:2005
- FSSC 22 000
- QS (feed products for the German market - equivalent to GMP+)
- QAL (feed products for the German market - Bavaria)
- PL-EKO-02 - certificate allowing salt licks and feed salt for sale on organic farms

INOFAMA S.A.

INOFAMA S.A. has been designing and manufacturing steel structures for over 40 years, as well as providing zinc coating and machining services.

The company is a leading producer in the agricultural sector - it manufactures, maintains and renovates agricultural and livestock equipment. The products offered by INOFAMA S.A. include water tanks, transport boxes, trailers, feeders and equipment necessary to equip barns.

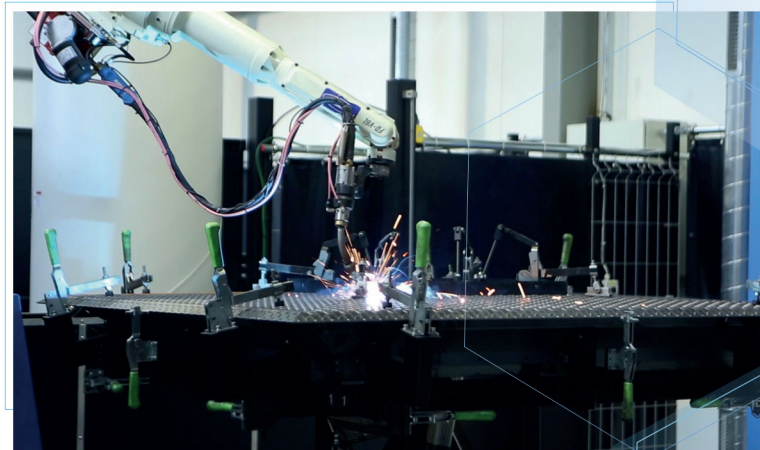

Additionally, the company rents production and storage space. INOFAMA S.A. has a modern construction office and an efficient hot-dip zinc plant. INOFAMA S.A. exports its products to France, Germany and Denmark.

Offer:

- hot-dip galvanizing services
- storage containers (e.g. for municipal waste, sump trays and cabinets for oils and other chemicals)
- tractor and car trailers and their components
- water tanks - offered as stationary or mobile tanks from 500 to 8000 litres capacity
- barn equipment - modern solutions for livestock buildings and milking parlours
- agricultural equipment (e.g. feeders, pasture gates, loading boxes, drinkers)

Certificates:

- ISO 9001

CHEMAR S.A.

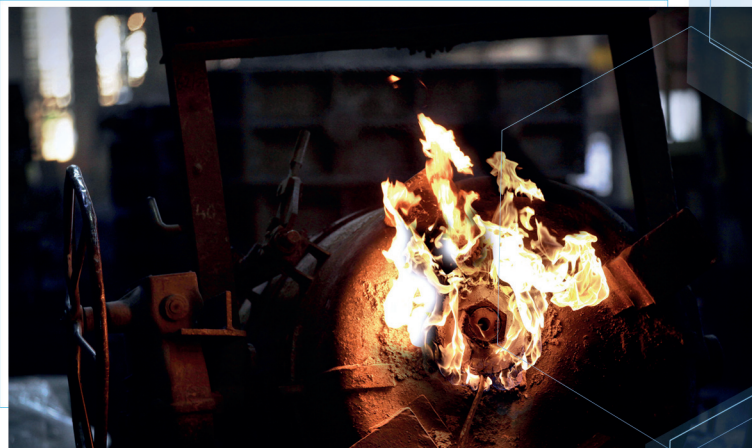

CHEMAR S.A. is a manufacturer of steel castings with its own research laboratory and modelling plant. Its products are used both in Poland and abroad. CHEMAR S.A. exports its products mainly to Great Britain, Sweden, Denmark and Germany. Casts produced in the company are made of structural carbon steel, which are heat-resistant and resistant to abrasion and mining waters. The products manufactured in the foundry are used in many industries, including energy, chemical, machinery, petrochemical and cement and lime industries.

Offer:

- cast iron and steel castings for production of industrial fittings, pipeline elements
- pump components, machine castings, carpet panels for cement mills
- casting modelling service in a wooden or resinous form

Certificates:

- Quality Management System according to ISO 900:2015

ZAKŁAD KONSTRUKCJI SPAWANYCH ŁABĘDY sp. z o.o.

Zakład Konstrukcji Spawanych Łabędy sp. z o.o. is a leading supplier of large-size welded structures which are used in construction machines (mobile cranes), opencast mining machines and power engineering. The structures manufactured by ZKS Łabędy are characteristic in being made from hard-welded and fine-grained structural steels or special steels. For manufacturing, precise machining is required, which, due to its dimensions, can only be performed on large numerically controlled machine tools. The company also offers welding services used in the power industry. The company exports its products to western markets, mainly to Germany and France.

Offer:

- chassis and body frames for mobile cranes
- extension supports and boom assemblies for mobile cranes
- excavator frames and excavator boom frames
- frames and frame elements for rail vehicles

Certificates:

- ISO 9001:2015 and ISO 14001:2015 certificates for the production of chassis frames and bodies of mobile cranes, large-size welded structures of construction machinery and production services
- Welding certificate for rail vehicles and components for rail vehicles to DIN EN 15085-2
- Welding Certificate for steel structures EN1090-2 EXC4
- Welding Certificate for aluminium structures EN1090-3 EXC4
- Certificate authorising repairs of cranes and overhead travelling cranes - UDT
- Approval for welding of steel structures according to DIN 18800-7; 2002-09 Class E and Quality System for Welding according to DIN EN ISO 3834-2

GRUPA PRZEMYSŁOWA BALTIC sp. z o.o.

Grupa Przemysłowa Baltic is part of the IDA Capital Group. The company is active in the management, optimisation and development of manufacturing techniques in the segment of products from the shipbuilding, marine and wind energy industries. After the lease of companies of Gdańsk Shipyard and Gdańsk Shipyard (previously: GSG Towers) in 2019, Grupa Przemysłowa Baltic acts as a leading entity in the group, taking advantage of access to the quay, modern assembly plate and the largest production hall in Europe (6.5 ha). In addition, Grupa Przemysłowa Baltic cooperates with the largest European shipyards in the field of building blocks for passenger ferries. In 2019, Grupa Przemysłowa Baltic completed more than 40 projects, giving a total of over 35,000 tonnes of steel structures. The products include: sections and ship blocks for Finnish, Norwegian, Danish and French shipyards, 125 sections of wind towers and offshore structures and infrastructure for Scandinavian companies. In the years to come, Grupa Przemysłowa Baltic plans to continue to work with its current customers and to expand its production ranges and launch pilot projects.

Offer:

- distribution: blocks, hulls, ships
- onshore and offshore wind towers
- offshore structures: platforms, subsea, secondary steel
- Infrastructure: cranes, gantries, bridges

Certyfikaty:

- ISO 9001:2015
- ISO 14001:2015
- ISO 45001:2018
- PN-EN 1090-1+A1:2012
- PN-EN 1090-2:2018-09
- ISO 3834-2:2007

ENERGOMONTAŻ-PÓŁNOC GDYNIA S.A.

ENERGOMONTAŻ-PÓŁNOC GDYNIA S.A. is a manufacturer of steel structures and equipment for the marine energy industry. The company specialises in production for renewable energy - offshore wind farms. Experience in creating structures made of high-grade S420, 460 or 690 steel and the application of top-class technology in welding allow the company to offer its services in the onshore power industry, including nuclear power, as well as in the petrochemical, engineering and shipbuilding industries. The company also cooperates with entities operating in the traditional energy sector, including oil mining. The complete offer of EPG S.A. and the highest quality of services allowed the company to build a brand recognised on European markets. The company is in the process of being incorporated into Grupa Przemysłowa Baltic sp. z .o.o.

Offer:

- process modules and residential superstructures for mining platforms and marine transformer stations
- lifting devices and their components
- foundation elements of offshore wind farms
- large steel structures

Certificates:

- ISO 9001
- ISO 14001
- PN-N 18001
- OHSAS 18001
- EN ISO 3834-2
- ISO 1090 exc. 4

POLSKA GRUPA OPAKOWANIOWA OPAKOMET S.A.

POLSKA GRUPA OPAKOWANIOWA OPAKOMET S.A. is a leading manufacturer of plastic products and aluminium tubes in Poland.

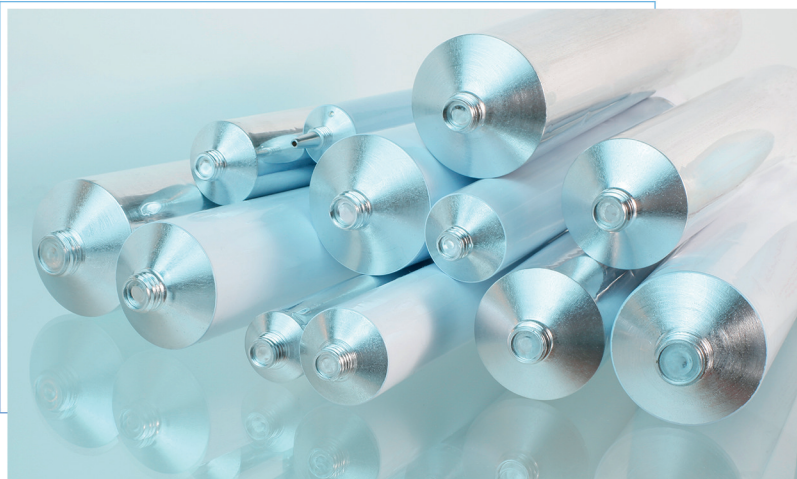

Its production is based on injection moulding and blow moulding technologies, and its modern machine park is equipped with high-class plastic processing machines. The Company manufactures bottles, canisters, caps and lids, but it also produces plastic elements to individual orders. Aluminium tubes have a very wide range of applications, e.g. in the pharmaceutical, cosmetic and food industries or in the production of household chemicals. The Company's products are sold on the domestic market and to foreign customers. POLSKA GRUPA OPAKOWANIOWA OPAKOMET S.A. is an ecological leader in the packaging industry. The offered assortment can be manufactured in an ecological version from post-consumer recycled material.

Offer:

- aluminium tubes
- plastic products for use in the food industry
- Group T2 Standard
- C1-Organic line packaging, T1-Pionier and T5-Radix product lines
- 4.7L packaging for AdBlue

Certificates:

TEOFILÓW S.A.

TEOFILÓW S.A. produces and sells high-quality knitted fabrics. Nearly fifty years of tradition, application of modern technological processes and constant modernization of the machine park have made the products of this company appreciated not only in Poland but also abroad. Knitted fabrics are exported to Germany, Italy, Sweden and Great Britain. The customers of Teofilów are mainly clothing manufacturing companies. Wide technological and production possibilities allow the company to offer finishing and knitting services as well as knitwear made according to the customer's pattern. The high level of computerisation allows for efficient handling of production processes. For several years the company has been involved in the development of the production of the so-called bio-knitted fabrics made of organic cotton. Such production is a response to the contemporary needs of environmental protection. The export markets for the company's products are: China, Germany, Australia, India, Russia, Czech Republic, Indonesia, Thailand, France, Hungary, Congo, Qatar or Mauritania.

Offer:

- raw materials: cotton, supima, organic cotton, viscose, bamboo, micromodal, modal, polyester and mixtures of these raw materials also with the addition of elastane, e.g. lycra
- splots: single jersey, interlock, welt, tracksuit, loop terry, velour, pike, jacquard and others
- services for the finishing of knitted and woven fabrics of natural fibres (cotton), artificial (viscose and synthetic (polyester) and mixtures thereof
